Kevin Y. Zhong

+1 (267) 918-6232 | Champaign, IL | yiz29@illinois.edu | linkedin.com/in/clckkkkk | www.clckkkkk.site

Education

University of Illinois Urbana-Champaign Aug 2025 — May 2029
B.S. in Electrical Engineering; Minor in Business *Champaign, IL*

Skills

- **Languages:** C/C++, Rust, Python, TypeScript/JavaScript, Swift, Java, HTML/CSS
- **Technologies:** React, Next.js, Node.js, PostgreSQL, AWS (S3, SQS, IoT Core), Docker, Git, Linux, NixOS, PyTorch

Past Experience

Work

Software Engineer Intern (Client & Web) May 2026 — Aug 2026
Alibaba Cloud — Qoder (https://qoder.com/) *Hangzhou, China*
- Shipped production fixes and features for Qoder IDE; owned Quest Mode's side-panel terminal lifecycle and built artifact review interactions with inline annotations and contextual follow-up questions
- Owned end-to-end integration of Qoder Cloud Agents with Harness, Alibaba's AI-native engineering orchestration platform, enabling standardized, auditable workflows; helped grow onboarded agents from 800 to 2,000 (+150%)
- Independently built Qoder's AR-glasses client, adapting agentic coding workflows to smart glasses end to end
- Prototyped an ambient-display companion end to end, from product exploration through hardware–software integration

Founder & Software Engineer May 2026 — Present
inklet LLC (https://www.iminklet.com/)
- Built web, macOS, Windows and iOS Portal clients for content capture, device pairing and e-ink display management
- Built and published the TypeScript SDK with typed resource APIs, idempotent content submission, direct-to-S3 uploads and upload-ticket retry; validated three delivery modes with end-to-end tests and ESM/CommonJS support
- Integrated clients and SDK with an asynchronous AI/rendering pipeline using AWS SQS, S3 and IoT Core; owned structural design for D1 displays and H1 local AI compute hubs

Team Captain & Programming Team Lead Aug 2022 — Mar 2025
FRC Zodiac 6353 (Student Club) *Shanghai, China*
- Led a 35-member FRC team across robot programming, CAD and fabrication, coordinating software and hardware delivery

Projects

Creator & Developer, SlateOS (https://slate.benchgrid.dev/) Sep 2026 — Present
- Independently built an open-source, agent-native NixOS desktop with a Rust runtime and Claude Code/Codex adapters
- Implemented a dedicated Wayland input seat and background display so agents can operate compatible apps while users retain their own keyboard, pointer and focus; exposed desktop controls through MCP
- Built an approval broker, tool audit records and scoped btrfs recovery; connected runtime services over Unix sockets

Quantitative Researcher, OddsParse Lab (https://www.oddsparse.trade/) Apr 2025 — Present
- Built Chronallax, a Rust arbitrage engine with 39.3 µs p50 decision latency and 3.4 ms p50 end-to-end order latency
- Explored prediction-market models, market intelligence and US-equity intraday strategies within OddsParse Lab

Frontend Developer & Project Manager, A3A Protocol (https://a3aprotocol.com/) Oct 2025 — Nov 2025
- Led a five-person team at ETHOnline 2025, coordinating project planning, task allocation and team communication
- Built a Vite/Tailwind frontend for AI-agent commerce with smart-contract escrow, integrating WalletKit authentication and a Python AI agent backend

Research

Co-organizer, IEEE WACV 2027 SEAI (https://wacv27seai.synoring.ai/) Jan 2027 (Upcoming)
- Co-organizing the first Social Embodied AI Workshop on multimodal perception and human-robot interaction

Enhanced U-Net Usage for Road Network Prediction Dec 2023 — Oct 2024
- Implemented a U-Net model using geospatial data to forecast potential road networks
- TechRxiv preprint (DOI: 10.36227/techrxiv.172902820.02096061/v1); 1 citation in 2025

Honors

National Olympiad in AI National Merit Award, ITCCC Jun 2024
National Top 6% in Lanqiao U18 Programming Competition (C++), MIIT Oct 2022
